

In The Cambridge Color Lab, hues are created with advanced color micropearls for more dramatic tinting and true pigmentation. Choose from a wide spectrum of popular solid colors or consider Cambridge blends – combinations of two select solid colors mixed in unequal amounts for an appearance that is truly unique to each pavingstone, and as a result, every installation.

Ask about Cambridge custom colors and engraved pavers for the ultimate in personalization.

Inquire about special ordering in a non-standard or custom color. Cambridge can produce pavingstones to match any desired color. Not every shape is available in all colors.
