

DISCOVER A WIDE VARIETY OF COLORS

For long-lasting, durable colors, Grinnell concrete paving stones are saturated with color throughout. To achieve this, we blend pure pigment into our special concrete mixture, using only the finest iron oxides.

You can create unique looks by installing different color paving stones within a pattern or along the border for bold accents. Let your imagination run wild with random splashes of color and unique designs. You will be surprised at how well they fit with nature's color palette.

PAVER COLORS

Multicolor

Brown

Red

Brown Flash

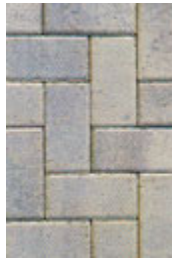

Charcoal

Natural

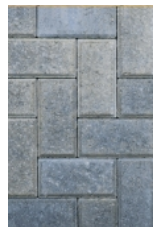

Terracotta

Gray Flash

Hickory

Pecan

Color samples should be used only as a guide. Colors should always be chosen from actual samples.

Actual weight, size, color and availability may vary by location. Photographic reproduction cannot precisely convey the feel and color of the actual products. Before making your selection, we recommend that you look at actual samples.

Since cubes of product may contain a different predominance of color, we recommend that product be selected randomly from several cubes during installation to obtain uniform distribution of color.

A white deposit known as efflorescence may appear naturally on any concrete or masonry product. It does not affect the structural integrity and will dissipate over time. Efflorescence is not indicative of a flawed product.
