Everything's Possible With Your New...

PRODUCT SHOWCASE

"A gallery of vendor products"

Welcome to the premiere edition of All Island Mason Supply's incredible new Product Showcase!

Within these pages, you'll find valuable information and exciting ideas to help you create the home you've always wanted.

During our more than 15 years doing business on Long Island, we've taken great pride in being able to offer our customers the very finest masonry and landscaping supplies, tools, and equipment, as well as an unparalleled level of personal service. The support and ideas from our skilled employees and customers like you have enabled us to grow into what we feel is Long Island's premiere supply yard.

During this time, we've also been able to forge strong partnerships with our vendors, and build solid relationships with the companies that manufacture the many high-quality products we sell. Our new Product Showcase reflects the strength of these alliances. In these pages, you'll find an extensive gallery of exceptional products, assembled together so you have instant access to all the top-quality supplies you need during your decision-making process. It is our hope it will assist you in developing a well-conceived project that goes smoothly from concept through creation.

Since 1988, All Island Mason Supply has been re-defining the standard of reliability, from the finest-quality products at the right price, to swift, responsive on-site delivery. Our people possess both the knowledge and experience to handle all your needs, and our beautiful outdoor display center makes envisioning your finished project easy. This new Product Showcase is just one more example of our dedication to your ultimate satisfaction.

We hope you enjoy the debut edition of All Island Mason Supply's Product Showcase, and look forward to your comments.

Important Tips

WHEN SELECTING YOUR CONTRACTOR...

As in everything, it's essential to know as much as possible when choosing a contractor for your project. All Island Mason Supply recommends employing the following criteria:

- 1** Look for a licensed contractor with at least 5 years of experience doing the type of work your project requires.
- 2** Beware of "fly-by-night" contractors who arrive in an unmarked truck or van, or who won't give a business address.
- 3** Don't fall prey to high-pressure sales tactics, or offers to do a job at greatly-reduced prices.
- 4** Make sure the contractor you select has liability insurance, and ask to see a copy of his/her worker's compensation policy.
- 5** Insist on a contractor that provides warranties on materials and workmanship.
- 6** Be sure you have a contract in writing that defines the responsibilities of all parties involved, as well as how you will be charged for services!
- 7** Know the complete details about your contractor's change order policy.
- 8** Get at least three bids for your project and review them carefully to make sure everything you want is included.

Here's Why:

WITHOUT ARMORTEC

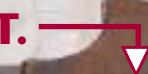

A worn, faded look will occur after only one year of ordinary wear on pavers without ArmorTec as stones (aggregate) in the concrete appear on the surface.

WITH ARMORTEC

With ArmorTec manufactured into the top 3/8 inch of Cambridge Pavingstones, the color remains rich and the surface stays smooth.

INSIST ON IT.

PAVERS with STYLE

Today, expanding the home means more than just adding a room. More and more homeowners are creating soothing and versatile outdoor living spaces for relaxing and entertaining. Grinnell's distinctive pavers and wall stones enable you to extend to your landscape the unique taste and style that your home reflects.

SPARTAN I & II WALKWAY

Discover how ordinary spaces can be transformed into extraordinary environments. Whether you are installing a driveway, patio, pool deck, walkway, courtyard or some other project, you will find that your hardscaping design options are endless with Grinnell.

"I can't believe how good Grinnell's pavers and wall stones made our property look. Without spending a fortune, we have truly enhanced the appearance of our home. It makes us feel like millionaires every time we pull in the driveway."

Michael and Lisa T.

LAFARGE Packaged Products

Type I

Type I is a general purpose portland cement to be used when special properties of other cement types are not required. Typical applications include foundations, paving slabs, sidewalks, bridges, masonry units, and precast concrete products.

Bag Weight: 94lb

Type IA

Type IA is also a general purpose portland cement that contains an air entraining agent. Entrained air enhances concrete's durability when exposed to freezing temperatures.

Bag Weight: 94 lb

Type II

Type II is for general use applications when moderate sulfate resistance or moderate heat of hydration is desired. Type II will usually generate less heat and at a slower rate than Type I.

Bag Weight: 94lb

Type III

Type III, when compared to Type I, generates higher early compressive strengths. This product is usually chemically the same as Type I, except it is ground finer. Type III is typically used when forms need to be removed quickly. Type III is also used in cold weather to aid slower hydration conditions.

Bag Weight: 94lb

Eaglebond™ Type S Portland/ Lime

Eaglebond Type S is a controlled blend of portland cement and Type S hydrated lime. Eaglebond provides an excellent level of performance in functional areas of workability, compressive and flexural strength, water permeance, durability, and appearance.

Bag Weight: 70lb

Type N, S, M - Masonry Cement

Lafarge Masonry Cement is specially formulated and manufactured to produce masonry mortar for use on brick, block, and stone masonry construction when mixed with mason's sand and clean, potable water. Lafarge Masonry Cement is also used to produce stucco.

Lafarge Type N, S, and M Masonry Cement will make ASTM C 270 mortar for unit masonry with minimum compressive strengths of 750 psi, 1800 psi, and 2500 psi in 28 days, respectively.

Bag Weight: N=70lb, S=75lb, M=80lb

Additional products available from Lafarge

- 1. White Type I Portland** is used to produce architectural concrete that exhibits uniform, white, light and warm colored surface finishes.
- 2. White Type N & S Masonry Cement** is specially manufactured to produce white masonry mortar for use on brick, block, and stone masonry construction when mixed with a white mason's sand and clean, potable water.
- 3. Type I Water Proofing** is specially manufactured to reduce the capillary water transmission under little or no pressure, but does not stop water-vapor transmission.
- 4. Dark Masonry** is used to enhance the appearance of commercial and residential masonry structures.

Mixing Mortar In accordance with ASTM C 270 proportion specification, batch at the rate of one bag of Lafarge Masonry Cement to 2-1/4 to 3 cubic feet of damp, loose mason's sand, complying with ASTM C 144, and potable water. First, add 2/3 of the water followed by 1/2 of the sand, all of the cement, and then the remainder of the sand and water. Continue mixing the mortar for a minimum of five minutes after all of the materials have been charged. The resulting mortar should meet or exceed the property requirements of ASTM C 270. Use of a cubic foot box to measure sand will improve batch-to-batch uniformity.

Old-world charm. Classic beauty. New age technology.

NICOLOCK tumblestones with **Armor-Con Technology™** let you enjoy it all...year after year after year.

➤ **NICOLOCK** Tumblestone Pavers ➤

It's not just the style and rich color of **NICOLOCK** tumblestones that make them so popular and appealing: it's the fact that they keep their form and beautiful old-world appearance for so many years. Through wind, rain, snow, and everyday use, our amazing Armor-Con Technology™ allows them to remain looking virtually new. That's because our exclusive Armor-Con process produces a paving stone more than twice as strong as normal poured concrete, which delivers over six times the color penetration of concrete veneer coatings. It's so strong and durable, it needs no additional sealing. No matter how you look at — or over how many years — **NICOLOCK** with ArmorCon is your textbook solution for lasting quality.

Nicolock Paving Stone
With Armor-Con Technology™

Veneered Paving Stone

- Exclusive use of Armor-Con™ Technology on all products
- Largest variety available of colors and blends
- Never fades - retains color all the way through
- Guaranteed no delamination or deterioration
- Lifetime guarantee from structural failure (Residential Applications)
- Manufactured on Long Island
- Made in USA

*Our beauty sets the mood...
our quality makes it last for years.*

***Techo-Bloc: Designed To
Complement Your Life.***

When it comes to creating a romantic setting, one of elegant ambiance, or a bright family environment, Techo-Bloc is the overwhelming choice of discriminating homeowners. The reasons are easy to see.

Techo-Bloc's innovation and craftsmanship have made it possible to develop products that are the perfect blend of style and substance. Our experienced team of designers can transform the exterior of your home into virtually any design you desire, bringing all the elements together beautifully. Best of all, these good looks go far beyond the surface: thanks to the cutting-edge technology built into every one of our pavers, slabs, copings, and retaining walls, their beauty endures for years to come.

So, whether you prefer the classic beauty of Elena, the bold new-age Colossal look, or anything in-between, let Techo-Bloc make the most of your time with family and friends by creating the ideal outdoor setting. We invite you to turn the page to learn more about our beautiful stone products, as well as visit our website at techo-bloc.com for our full line, as well as a world of design possibilities.

Once you see all Techo-Bloc has to offer, you'll understand why we're a welcome addition around the finest homes.

Techo-Bloc

Let us inspire you

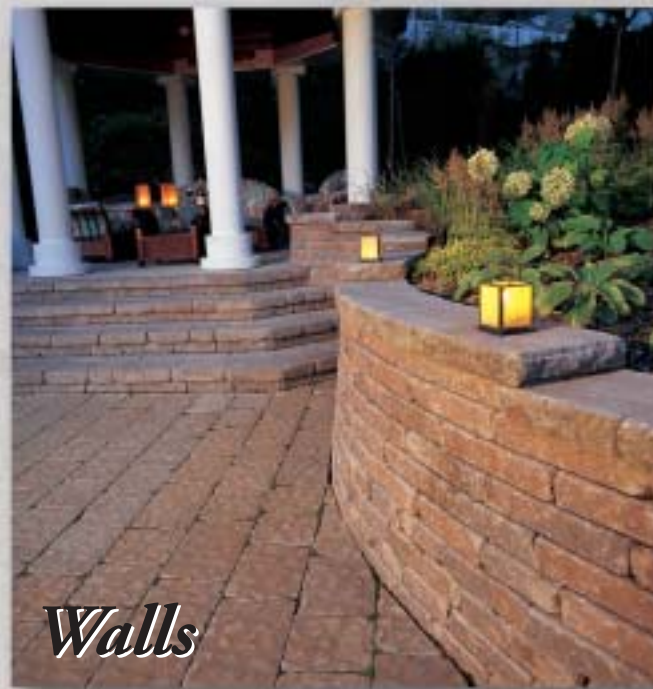

Pavers are just the first step on the path to your ideal home...

Pavers

Concrete pavers are being seen with increasing frequency on commercial, as well as residential, construction job sites. Manufactured in a wide variety of colors and textures, Techo-Bloc pavers interlock together to create an attractive patterned surface — enhanced by a state-of-the-art Granitex finish — that's ready for immediate use. Another reason Techo-Bloc pavers have seen such a steady rise in popularity is the fact that they can be easily removed and re-installed as necessary, significantly reducing future maintenance problems and costs.

Walls

For protection. For privacy. Or for the sheer beauty they can bring to any landscape. Whatever your reason for wanting one, a Techo-Bloc wall can bring long years of pleasure due to their superior durability and stunning appearance. With so many appealing styles and colors, you're bound to find the precise design to fit your vision of the ideal home environment.

Slabs

Not quite as thick as pavers, concrete slabs are the ideal choice for areas without vehicular traffic, such as patios, sidewalks, and steps, as well as around pools, decks, solariums, and greenhouses. As visually appealing as they are reliable, Techo-Bloc concrete slabs are also perfect for a broad range of custom-stone projects, including chimney and wall caps, posts, mantels, treads, veneer, and hearths.

Our Warranty Is Your Assurance Of Satisfaction.

The entire range of Techo-Bloc products are offered with a transferable Techo-Bloc guarantee. However, Techo-Bloc's responsibility is limited to its products and not to their cost of installation.

Techo-Bloc guarantees its products against deterioration resulting from natural causes and abnormal deterioration of the surface due to the use of sodium chloride (NaCl) such as de-icing salt. Techo-Bloc is proud to certify that our paving stones meet the latest standards effective in Canada and throughout North America, as well as meeting or surpassing the requirements of the B.N.Q (N.Q.2624.120) and CSA (A231.2-M95), standards acknowledged as the strictest in the world.
